Experience

Jamie | *Software Engineer, Remote* Nov. 2026 – Present
- Improving Jamie's custom CMS
- Building the marketing site and brand kit
- Keeping new UI consistent with the design system

Origin | *Frontend Engineer, Remote* Mar. 2026 – Oct. 2026
- Improved the UI and UX of existing products
- Worked across multiple products: web apps with React and Tailwind CSS, and a desktop app with SolidJS

Projects

Rhyme | *TanStack Start, tldraw, Hono, tRPC, Better Auth, Cloudflare Workers, D1, R2, Durable Objects* Sep. 2026
- AI-powered whiteboard where an assistant edits the canvas, running in Cloudflare Durable Objects
- Drawings save locally first, then sync to R2 with version checks in D1; guest drawings import on sign-in
- Workers AI with a monthly token budget per user, plus encrypted bring-your-own API keys

Rubik | *React, Vite, TanStack Router, Hono, tRPC, Better Auth, Drizzle ORM, Neon DB, Cloudflare Workers* Aug. 2026
- Fullstack Cloudflare template: Hono and tRPC API on Workers with end-to-end types to a React 19 SPA
- Email, GitHub, and Google sign-in with Better Auth; verification emails sent through Cloudflare Email Service
- Turborepo monorepo with a shared Drizzle schema on Neon Postgres and a Base UI component package

Akira | *Next.js, TypeScript, Better Auth, Drizzle ORM, Neon DB, Dodo Payments, Resend* Mar. 2026
- Pre-configured SaaS starter with multi-provider auth (Google, GitHub, email) using Better Auth and session management
- Integrated Dodo Payments for subscriptions and Resend with React Email for transactional emails
- Drizzle ORM with Neon Postgres for type-safe schema definitions and migration workflows

StealIt | *Next.js, TypeScript, Cheerio, Tailwind CSS, Shadcn UI* Feb. 2026
- Extracts images, videos, SVGs, and favicons from any URL by parsing HTML server-side with Cheerio
- Handles srcset attributes, CSS background images, OG/Twitter Card metadata, and inline SVG serialization
- Grid-based preview UI with type filtering, individual download, and batch export

Notes | *Next.js, TypeScript, TipTap, Drizzle ORM, Neon DB, Better Auth, SCSS* Jan. 2026
- Rich text note editor built on TipTap with folder organization and auto-save
- Auth flow using Better Auth, with Drizzle ORM and Neon Postgres handling user and note persistence
- Dark/light theme support using custom SCSS alongside Tailwind CSS
